Home Beautifying

The principles of proper planting are not hard to master. The shrubs should be massed into corners and borders, and a selection made differing in height so that all of them can be seen and intermingle in effect, with their bloom coming at different seasons so that they are always interesting. You can easily choose this graduation from the lists referred to. One often sees an elegant house that lacks the final touch to change it into a "home." Landscape planting is the frame of the picture; the artistic setting; that final touch that changes your house to a home.

As a background or a frame to the picture which is to be created, shrubs or trees are indispensable. The idea being to have the surroundings harmonize so that the impression will be comfortable and homelike. If you need any assistance in producing an artistic effect our landscape department is at your command
